

Are you a budding fashion designer looking to have fun with color, style and pattern, while also learning the skills and steps to creating an exciting and marketable fashion collection?

Join our winter session:

INTRODUCTION TO FASHION DESIGN

This 10-week class takes budding designers through the same design processes that real designers follow in the industry.

OUR CLASS IS STRUCTURED TO TEACH STUDENTS:

- ✕ The creative processes and mechanical skills needed to design a fashionable and marketable clothing collection.
- ✕ How to use the fun & creative software, Graphics-Toolbox, to design a sportswear line.
- ✕ To utilize color in exciting ways to create appealing color palettes and dynamic print collections.
- ✕ To use a library of existing sketched silhouettes & garment parts, combining them to create new styles and to fill their silhouettes with their colors & prints.
- ✕ To merchandise their lines creating a salable balance of tops and bottoms, solids and prints.
- ✕ Important related specialties will be introduced like the science of color, an introduction to fabric and garment construction, and developing charitable opportunities through fashion.

An emphasis will be placed on working together as a design team and sharing ideas throughout the design process.

The class will finish with each designer presenting her/his story board collection to the other students and parents.
